

THE FUTURE IS NOW!

Cyber & V-Hair are types of high-tech synthetic hair fibres exclusively developed and patented by Aderans. These fibres look, feel and act like natural hair making this an unparalleled alternative solution to human hair.

Extensive development and research have produced fibres that combine the advantages of synthetic hair fibres with that of real hair.

The biggest advantage is the longevity, lasting nearly twice as long as classic synthetic fibre or human hair systems.

With the addition of these fibres being heat resistant in temperatures up to 140°C, you are able to heat-style the system with ease, creating your desired hairstyle and even wear it in environments of extreme heat such as the sauna!

Another key characteristic of Cyber/V-Hair is the way the fibres absorb water. When wet, these fibres show no visible difference to that of real hair, making them perfect for activities such as swimming or when caught in the rain.

Superior qualities that differentiate these fibres include:

CYBERHAIR

Human Hair-like Appearance

Light Weight

Colour Fast

Heat Resistant

Absorbs Moisture

V-HAIR

Human Hair-like Appearance

Light Weight

Colour Fast

Heat Resistant

Absorbs Moisture

Style Changeable

Choice of Texture

These qualities along with the step-by-step guidance of a certified Aderans Cyber/V-Hair consultant will help to create the most natural looking hair you could wish for.

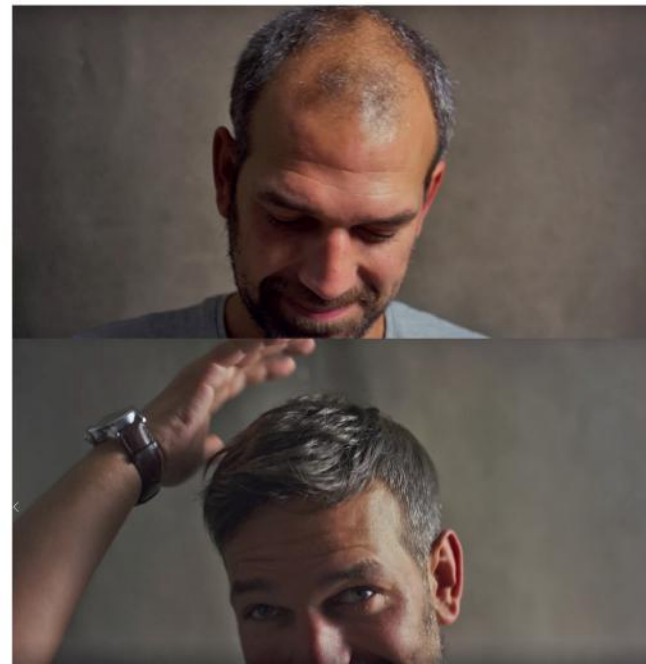

For those with hair loss a full head of hair is no longer an impossible dream, it's a reality and you won't even have to change your lifestyle to achieve it.

You can continue to be as active as you have always been, because wet or dry, windblown, or styled, Cyber/V-Hair looks, feels, and acts like your own hair!

All Cyber/V-Hair systems are non-surgical, non-invasive, and exclusive, giving you the opportunity to create your own distinctive style so that it is perfect for you and your lifestyle.

We take great pride in providing you with the highest quality hair system, which is not only undetectable but also natural looking and customised to fit your specific and personal preferences.

YOUR JOURNEY TO A CYBER / V-HAIR SYSTEM

1. BOOK AN APPOINTMENT

Book a free, no obligation consultation with one of our Aderans certified consultants to discuss your hair loss requirements

2. DESIGN THE DESIRED PRODUCT

Taking into consideration your specific criteria, personal requirements and lifestyle we will work with you to create the perfect product.

3. CREATE YOUR DREAM HAIRSTYLE

You have the option to choose the specific colour, density, style etc. of your desired hairstyle with the guidance of the Aderans Consultant.

4. ORDER & FINISH

Order and receive your desired hairstyle to enjoy the unlimited possibilities in your everyday life.

KEY REMINDERS

- Ensure a qualified Cyber/V-Hair consultant cuts your hair. Failure to do this can result in damages to your hair system.

- Replenish the moisture in your Cyber/V-Hair system by washing it every 3-4 days.

- Always spray Cyber/V-Hair Moisture Protection Spray before and after brushing and/or styling.

- Never rub your hair system with a towel. Always pat the hair dry.

- Saturate your hair system with water and Detangle Cream Conditioner before and after entering chlorinated water.

- Sleeping on silk or satin pillowcases will extend the longevity of the system.

- Avoid exposure to excessively high heat, such as rush of heat when opening oven doors, flames from barbecues, halogen heaters etc.

- To clean tape areas: Remove your Cyber/V-Hair system from back to front as instructed by your stylist. Peel off old tape using the solvent to remove excess tape residue. Add a small amount of Cyber/V-Hair shampoo to a moistened washcloth and gently wipe clean.

- Your Cyber/V-Hair warranty is honoured when following the correct procedures.

AFTERCARE

CARING FOR YOUR CYBER & V-HAIR SYSTEM

Aderans

CARING FOR YOUR CYBER/V-HAIR SYSTEM

To keep your Cyber/V-Hair system looking its best between maintenance visits we encourage you to follow the instructions outlined in this leaflet.

Remember, following the recommended guidelines and using specially formulated Cyber/V-Hair aftercare products will enhance the appearance and extend the life of your system.

Cyber/V-Hair offer specific haircare products to best suit your needs and lifestyle. These products are formulated with special ingredients to retain and protect the Cyber/V-Hair's moisture content, further enhancing its appearance. By following the easy steps provided in our aftercare advice leaflet and the guidance from your Cyber/V-Hair consultant, your hair system will continue to look and feel great month after month!

AFTERCARE GUIDANCE

STEP 1: CLEANSING - REVITALISING SHAMPOO

Cleansing your hair system once removed: Softly comb your piece to remove any tangles. Pour a small amount of REVITALISING SHAMPOO into a basin of lukewarm water and stir. Submerge the piece and leave to soak for 3-5 minutes, allowing cleansing treatment to freshen the hair. Gently swish your hair system in the water and rinse gently.

STEP 2: CONDITIONING – DETANGLE CREAM

After rinsing, dilute a small amount of DETANGLE CREAM into a basin of lukewarm water. Once again, submerge the system and allow to soak for 3-5 minutes in the treatment to condition the hair. Gently swish the piece in the solution. Rinse.

STEP 3: SOAKING

Immerse your Cyber/V-Hair system into a basin of 40°C hot water and leave to soak for 20 minutes, this step is very important to replenish the moisture.

STEP 4: DRYING

Wrap the system in a dry towel and gently pat dry. Take care NOT to massage or rub.

STEP 5: DAILY PROTECTION – MOISTURE PROTECTION SPRAY

Before brushing your system, apply MOISTURE PROTECTION SPRAY on the damp hair. Hold the bottle approximately 8 inches from the hair and apply a fine mist.

STEP 6: BRUSHING

Always spray your hair system with Moisture Protection Spray before and after brushing.

STEP 7: STYLING

You can use a hairdryer on a low heat to dry your hair system. Take care NOT to dry the system completely as it will remove too much of the required moisture. After brushing and styling, repeat STEP 5.

We recommend only sleeping with satin or silk pillowcases, as this will reduce friction.

It is advisable to following the above procedures every 3 – 4 days to replenish the moisture content of the hair system.

ATTACHMENT METHODS

Your stylist will help you to establish which method is best suited to your lifestyle, before guidance is given on the best method of care.

To clean tape areas: Remove your Cyber/V-Hair system from back to front. Using the solvent, remove the liquid adhesive, old tape or residue. Add a small amount of Cyber/V-Hair shampoo to a moistened washcloth, gently wiping the tape and front areas clean.

By cleaning the system daily, accumulated perspiration, oil and dirt is removed. Besides being clean and fresh, the longevity of the system will be extended. Daily cleaning of the tape and front areas is highly recommended.

Your Cyber/V-Hair warranty is honoured when you follow the proper care procedures and use the prescribed haircare products and styling tools.

For those with a continuous wear attachment method, showering for 3 minutes a day or more to saturate your hair system will offer replenishment.

When you first receive your Cyber/V-Hair system we strongly recommend you revisit your stylist after 10 days to ensure you are caring for and wearing it correctly. This will ensure you are receiving the most from your new hair.

Speak with your stylist about recommended products.
